First published in 1994, *The Complete Guide to Finding the Birds of Australia* was the first ever book of its type in Australia – a complete guide to locating every resident bird species in Australia, plus supplementary information on where to find rarities, migratory species and logistical information. This fully revised second edition expands on the best-selling appeal of the first, describing the best-known sites for all of Australia’s endemic birds, plus vagrants and regular migrants such as seabirds and shorebirds. It covers all states and territories, and is the first guide to include all of Australia’s island and external territories. A comprehensive Bird Finder Guide details site information on all Australian bird species, and the authors provide valuable travel advice, including transport, climate and accommodation. Profusely illustrated with colour photographs of interesting, unique or unusual Australian birds, this book is a must-have for all birdwatchers living in Australia or visiting from overseas. Balkan ceramic studies is an emerging field within archaeology. This book brings together diverse studies by leading researchers and upcoming scholars, capturing the variety of

current archaeological, ethnographic, experimental and scientific studies on Balkan ceramic production, distribution and use. Includes "Literature". List of members in each volume (except v. 6, new ser., v. 27). Piton de la Fournaise and Karthala are both shield volcanoes in the southwest Indian Ocean. This publication summarizes the work done on these very active basaltic volcanoes. Piton de la Fournaise has a long history of scientific research and monitoring, with many data collected during recent eruptions. It is certainly one of the most studied volcanoes in the world. The work presented in this monograph includes geological, geophysical, geochemical and petrological aspects, but also studies on physical geography, natural hazards and the sociological and behavioural approaches.' The Karthala volcano may be less well known, but it serves as an interesting comparison to Piton de la Fournaise. Although situated close to the volcanoes of Hawaii, it differs from them by its more alkaline magmas and less frequent activity. It was also monitored for more than 25 years, producing extraordinary eruptions in recent years. Vols. 1-69 include more or less complete patent reports of the U. S. Patent Office for years 1825-59. Cf. Index to v. 1-120 of the Journal, p. [415] Atlases accompany 1885-1891, 1894,1895, 1897-1904.
