As recognized, adventure as with ease as experience virtually lesson, amusement, as competently as covenant can be gotten by just checking out a ebook **Foundations Of International Migration Law Hardback** moreover it is not directly done, you could agree to even more vis--vis this life, as regards the world.

We have enough money you this proper as competently as simple artifice to get those all. We manage to pay for Foundations Of International Migration Law Hardback and numerous ebook collections from fictions to scientific research in any way. accompanied by them is this Foundations Of International Migration Law Hardback that can be your partner.

Right here, we have countless book **Foundations Of International Migration Law Hardback** and collections to check out. We additionally manage to pay for variant types and next type of the books to browse. The normal book, fiction, history, novel, scientific research, as with ease as various extra sorts of books are readily user-friendly here.

As this Foundations Of International Migration Law Hardback, it ends taking place being one of the favored ebook Foundations Of International Migration Law Hardback collections that we have. This is why you remain in the best website to see the unbelievable ebook to have.

This is likewise one of the factors by obtaining the soft documents of this **Foundations Of International Migration Law Hardback** by online. You might not require more become old to spend to go to the ebook creation as skillfully as search for them. In some cases, you likewise attain not discover the publication Foundations Of International Migration Law Hardback that you are looking for. It will unconditionally squander the time.

However below, later you visit this web page, it will be correspondingly completely simple to acquire as without difficulty as download guide Foundations Of International Migration Law Hardback

It will not recognize many get older as we accustom before. You can pull off it even if do something something else at house and even in your workplace. for that reason easy! So, are you question? Just exercise just what we meet the expense of below as competently as review **Foundations Of International Migration Law Hardback** what you subsequent to to read!

If you ally obsession such a referred **Foundations Of International Migration Law Hardback** book that will provide you worth, get the definitely best seller from us currently from several preferred authors. If you desire to funny books, lots of novels, tale, jokes, and more fictions collections are as well as launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every ebook collections Foundations Of International Migration Law Hardback that we will completely offer. It is not going on for the costs. Its about what you need currently. This Foundations Of International Migration Law Hardback, as one of the most keen sellers here will utterly be in the middle of the best options to review.

How should international law approach the critical issue of movement of peoples in the 21st century? This book presents a radical reappraisal of this controversial problem. Challenging present-day ideas of restrictions on freedom of movement and the international structure that controls entry to states, it argues for a new blueprint for international migration policy that eliminates waste, aids both developing and developed societies and brings attendant benefits to voluntary migrants and involuntary refugees alike. In a world of increasing disorder, it is suggested that current policy only adds to international instability and threatens the interests of a functional global community. Germany will spend around \$6.6 billion to cope with an estimated 800,000 refugees expected to have entered the country in the year 2016; this reality indeed extending further into 2017. Despite this overwhelming number of people entering the country, Chancellor Angela Merkel stated that there is "no legal limit to the number of asylum seekers Germany will take in in the coming years." The announcement by Merkel's coalition government arrived following Germany and Austria opening their borders to the large numbers of refugees making their way north and west from the Middle East, Africa and elsewhere. In particular, this statement came after the Syrian refugee crisis created the biggest refugee crisis the world has seen since the Second World War. Germany is seen as the immigration hub of Europe. It also happens to be the second most popular destination for immigrants after the United States of America. Germany is also the country in Europe with the highest numbers of foreign nationals to date. Germany established a new immigration law in 2005 was born out of a realization that it was coming to terms with a demographic crisis stemming from an ageing population and further complimented by a sharp decline national birth rates. In foresight, and within this unfortunate context, migration was seen by much of the German political class as an economic necessity, and the answer to the German economic and demographic time bomb. Between the years 2009 and 2014, annual net migration in Germany rose from 100,000 to 580,000 individuals. Moreover, the inflow of foreign nationals increased from 266,000 to 790,000 individuals. As of January 2015, approximately 10% of residents in Germany were foreign nationals, with around 12% born outside the country. Naturally, these figures have all risen significantly following Merkel's decision to allow what has reached one million refugees and migrants into Germany across 2016 and moving into 2017. Moving from this reality, the research will focus on the importance of the compliance of Germany's migration policy with International Refugee and Migration Law, as it is crucial for the country's survivability and move forward throughout this phase of its history. The

importance of the research lies in whether or not Germany's migration policy towards the Syrian Refugees in particular complies with its duties toward international law embodied in the treaties and conventions it has committed to. "Since the end of the cold war, international migration has come to be seen as one of the most pressing issues facing Europe in the 1990s. This study takes as its starting-point the growing concern among policy-makers and the public throughout Western Europe over the issue of migration. The author places the current migration debate within a comparative perspective, in its global and historical context, outlining current broad trends in 'economic' migration, and providing some pointers to how these trends have affected Western Europe in recent decades." "The analysis highlights elements of continuity and change in states' involvement in the migration process, a theme expanded in the context of the migration and migrant 'integration' policies pursued by both sending and receiving states. This provides a backdrop for a critical examination of current moves towards the harmonization of migration policy within the EC and wider groupings in Western Europe. The author raises questions about possible future responses to the migration challenge and asks, ultimately, what is the nature of that challenge?"--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved This volume comprises the relevant legal instruments and principal policy documents in the area of international and European asylum and migration, including the latest versions of pending legislative proposals. The range of issues covered is comprehensive: human rights; nationality and statelessness; equal treatment, non-discrimination, racism and xenophobia; citizenship, residence and free movement; borders, border management and entry; visa and passenger data; labour migration; family reunification; asylum, subsidiary and temporary protection; irregular migration; and trafficking in human beings. The texts have been ordered according to the multilateral co-operation level within which they were drawn up: either the United Nations, the Council of Europe or the European Union (including Schengen-level instruments). This edition provides practitioners, authorities, policy makers, scholars and students throughout Europe with an accurate, up-to-date and forward-looking compilation of essential texts on asylum and migration matters. All texts have been updated until 20 December 2018. This book employs methods from comparative law to analyze voluntary migration, exploring the free movement of immigrants and their freedom of settlement under Brazilian and Mercosul law, as well as under German law and the European Union's legal framework on migration. It discusses the level of protection granted to immigrants in terms of their right to enter and stay in Brazil and Mercosul, using German legislation and the EU's legal framework on migration for comparison. Accordingly, the book will help migration researchers to understand not only the structure and rationale of migration law in Brazil, especially after the entry into force of its recent Migration Law in 2017, but also its relation to EU and German provisions on voluntary migration. It demonstrates how the differing natures of the migration law adopted by Brazil and Germany have led to different approaches and, consequently, different levels of protection for immigrants. Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph on the rules on immigration and right of residence of non-nationals in Germany examines the legal and administrative conditions for persons not having the citizenship of a State to enter the country and to stay and reside there. It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting. It follows the common structure of all monographs appearing in the International Encyclopaedia for Migration Law, thus allowing easy comparison between the country studies. As migration and economic activities are often interlinked, the analysis pays particular attention to labour market access and regulation of self-employed activities for non-nationals. The book describes the status of such specific categories of persons as students, researchers, temporary workers, and asylum seekers, as well as the position of family members, detailing applicable legislation and providing practical information on administrative procedures, sanctions, and legal remedies and guarantees. The impact of international human rights law and various bilateral and multilateral agreements is considered, along with the broader application of national and local law to non-citizens in such areas as family relations, labour, social security, and education. Lawyers, scholars, practitioners, policymakers, government administrations, and non-governmental organizations involved in the development, practice and study of migration law will find this book indispensable. It will be welcomed by lawyers representing parties with interests in Germany and immigration specialists in both public and private organizations. Academics and researchers also will appreciate its value in the study of comparative trends and harmonization initiatives affecting migrants. Mediterranean states have developed various cooperation mechanisms in order to cope with the issues that arise from migration. This book critically analyses how institutional actors act and interact on the international scene in the control and management of migration in the Mediterranean. It highlights how, even though the involvement of 'universal' international organisations guarantees a certain balance in setting the goals of cooperation mechanisms and buttresses a certain coherence of the actions, the protection of migrants' fundamental rights is still an objective as opposed to a reality, and security imperatives and trends still prevail in the aftermath of the 2011 Arab Spring. Migration on the Move offers a critical review of the profound transformations that have taken place in the field of migration and asylum laws and policies in the past 20 years, and their implications for the refugee and migration issues faced by EU states. Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph on the rules on immigration and right of residence of non-nationals in Spain examines the legal and administrative conditions for persons not having the citizenship of a State to enter the country and to stay and reside there. It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting. It follows the common structure of all monographs appearing in the International Encyclopaedia for Migration Law, thus allowing easy comparison between the country studies. As migration and economic activities are often interlinked, the analysis pays particular attention to labour market access and regulation of self-employed activities for non-nationals. The book describes the status of such specific categories of persons as students, researchers, temporary workers, and asylum seekers, as well as the position of family members, detailing applicable legislation and providing practical information on administrative procedures, sanctions, and legal remedies and guarantees. The impact of international human rights law and various bilateral and multilateral agreements is considered, along with the broader application of national and local law to non-citizens in such areas as family relations, labour, social security, and education. Lawyers, scholars, practitioners, policymakers, government administrations, and non-governmental organizations involved in the development, practice and study of migration law will find this book indispensable. It will be welcomed by lawyers representing parties with interests in Spain and immigration specialists in both public and private organizations. Academics and researchers also will appreciate its value in the study of comparative trends and harmonization initiatives affecting migrants. This interdisciplinary study engages law, history, and political theory in a first attempt to crystallize the lessons the global 'refugee crisis' can teach us about the nature of international law. It connects the dots between the actions of Jewish migrants to Palestine after WWII, Vietnamese 'boatpeople', Haitian refugees seeking to reach Florida, Middle Eastern migrants and refugees bound to Australia, and Syrian refugees currently crossing the Mediterranean, and then legal responses by states and international organizations to these movements. Through its account of maritime migration, the book proposes a theory of human rights modelled around an encounter between individuals in which one of the parties is at great risk. It weaves together primary sources, insights from the work of twentieth-century thinkers such as Hannah Arendt and Emmanuel Levinas, and other legal materials to form a rich account of an issue of increasing global concern. A critical discussion of EU and ECHR migration and refugee law, this book analyses the law on asylum and immigration of third country-nationals. It focuses on how the EU norms interact with ECHR human rights case law on migration, and the pitfalls of European human rights pluralism. The centrality of international migration as a process articulating major transformations of contemporary societies offers an opportunity to make it the shared component of the theoretical and research agendas of the social science disciplines. In this volume a multidisciplinary team of authors presents a stocktaking account of current research on international migration in order to lay the ground for such an interdisciplinary collaboration. The first part of the book scrutinizes the theoretical concepts and interpretative frameworks that inform migration research and their impact on empirical studies in selected disciplines. The next two sections examine the epistemological premises underlying migration research in different fields of the social sciences and the challenges of 'informed translations' between these approaches. The final section considers the interdependency between the academic study of migration and the social and political contexts in which it is embedded. The book invites researchers to address the challenges raised by the empowerment of migration research, offering ways of communicating across different specializations and guiding readers towards a meaningful interdisciplinarity. International migration law is an important field of international law, which has attracted exceptional interest in recent years. This book has been written from a wide variety of perspectives for those wanting to

understand the legal framework that regulates migration. It is intended for students new to this field of study who seek an overview of its many components. It will also appeal to those who have focussed on a particular branch of international migration law but require an understanding of how their specialisation fits with other branches of the discipline. Written by migration law specialists and led by respected international experts, this volume draws upon the combined knowledge of international migration law and policy from academia; international, intergovernmental, regional and non-governmental organisations; and national governments. Additional features include case studies, maps, break-out boxes and references to resources which allow for a full understanding of the law in context. Since the publication of the second edition of this outstanding collection there has been a continued and rapid growth in the number international conventions, protocols, declarations and recommendations governing migration; and a transformation of the European Union's the legislation on the subject. The present edition takes account of these developments. Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph on the rules on immigration and right of residence of non-nationals in Estonia examines the legal and administrative conditions for persons not having the citizenship of a State to enter the country and to stay and reside there. It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting. It follows the common structure of all monographs appearing in the International Encyclopaedia for Migration Law, thus allowing easy comparison between the country studies. As migration and economic activities are often interlinked, the analysis pays particular attention to labour market access and regulation of self-employed activities for non-nationals. The book describes the status of such specific categories of persons as students, researchers, temporary workers, and asylum seekers, as well as the position of family members, detailing applicable legislation and providing practical information on administrative procedures, sanctions, and legal remedies and guarantees. The impact of international human rights law and various bilateral and multilateral agreements is considered, along with the broader application of national and local law to non-citizens in such areas as family relations, labour, social security, and education. Lawyers, scholars, practitioners, policymakers, government administrations, and non-governmental organizations involved in the development, practice and study of migration law will find this book indispensable. It will be welcomed by lawyers representing parties with interests in Estonia and immigration specialists in both public and private organizations. Academics and researchers also will appreciate its value in the study of comparative trends and harmonization initiatives affecting migrants. This volume provides a comprehensive and up-to-date analysis of the source and scope of international law on migration. It explores international norms on state authority to regulate migration, freedom of movement, forced migration, human rights, family unification, trafficking and smuggling of migrants, national security, rescue at sea, health, development, integration, and nationality. Migration and International Legal Norms shows that, despite the absence of a comprehensive legal instrument governing international migration, there is a wide range of legal norms relevant to migration embodied in multilateral treaties and conventions, regional agreements, and customary international law. It also identifies some significant gaps in international law, recommending areas for further cooperative efforts. This volume will be of interest to scholars and policy-makers, and to all those interested in how the community of nations is responding to the increasingly significant phenomenon of international migration. Questioning the seemingly ossified premise that states have an absolute discretion to control migration, this research submits that measures of migration control must be justified on a rational-legal basis and offers a regional model as the most sustainable long-term option. Japan and Global Migration brings together current research on foreign workers and households from a variety of different perspectives. This influx has had a substantial impact on Japan's economic, social and political landscape. The book asks three major questions: whether the recent wave of migration constitutes a new multicultural age challenging Japan's identity as homogenous society; how foreign workers confront the many difficulties living in Japan; how Japanese society is both resisting and accommodating the growing presence of foreign workers in their communities. This book contains the most up to date, original data on Japanese migrant culture available. Its inescapable conclusion is that the multicultural age has finally come to Japan; the question is whether foreign workers will be legally and socially assimilated into the fabric of Japanese society or will continue to be treated as temporary entrants with limited civil rights. The book is written with postgraduate students in Asian studies, Japanese studies, political science, sociology, anthropology and migration studies, in mind. "As globalisation gains momentum, international migration continues to divide opinion and polarise policy makers, politicians, and advocates. This polarisation has been reflected in research and publications, with pro-globalisation being pitched against anti-globalisation on the one hand, and an explosion of research on migration on the other. This book examines the interaction between the two and their impact on health for the first time, highlighting the myths and realities from an international, multi-disciplinary perspective. The book starts with an examination of the complex and multifaceted aspects of the globalisation phenomenon and its impact on population displacement and health, and concludes with a regional level analysis supported by country-specific examples. By highlighting common issues and differences across the globe, this book shows policy makers, political leaders, and international committees on migration the specificities of global migration and good practice across the world. Particular attention is paid to practical policy responses and governance as well as legal frameworks to manage the dynamics of migration, engage international institutions, and to maximise the benefits that internal and international migration bring."-- Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph on the rules on immigration and right of residence of non-nationals in Hungary examines the legal and administrative conditions for persons not having the citizenship of a State to enter the country and to stay and reside there. It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting. It follows the common structure of all monographs appearing in the International Encyclopaedia for Migration Law, thus allowing easy comparison between the country studies. As migration and economic activities are often interlinked, the analysis pays particular attention to labour market access and regulation of self-employed activities for non-nationals. The book describes the status of such specific categories of persons as students, researchers, temporary workers, and asylum seekers, as well as the position of family members, detailing applicable legislation and providing practical information on administrative procedures, sanctions, and legal remedies and guarantees. The impact of international human rights law and various bilateral and multilateral agreements is considered, along with the broader application of national and local law to non-citizens in such areas as family relations, labour, social security, and education. Lawyers, scholars, practitioners, policymakers, government administrations, and non-governmental organizations involved in the development, practice and study of migration law will find this book indispensable. It will be welcomed by lawyers representing parties with interests in Hungary and immigration specialists in both public and private organizations. Academics and researchers also will appreciate its value in the study of comparative trends and harmonization initiatives affecting migrants. This book brings together research on various aspects of environmental migration in the context of international law, with a particular focus on the emergence and development of regulation in the field of environmental migration at the global and regional levels. It discusses a theoretical framework for international regulation of environmental migration, analysing the notion and legal status of environmental migrants, categories of environmentally displaced persons, problems of legal regulation in the field of environmental migration at the international level, as well as specific circumstances of international labour migration induced by environmental factors. The annexes here bring together the most important international acts governing various aspects of forced and labour migration. As such, the book will appeal to international law experts, students, post-graduate students, researchers, and the general reader interested in international migration law. Migration is a complex and multifaceted issue, and the current legal framework suffers from considerable ambiguity and lack of cohesive focus. This Handbook offers a comprehensive take on the intersection of law and migration studies and provides strat Contemporary states are ambivalent about the global governance of migration: They desire more of it because they know they cannot reach their goals by acting alone, but they fear the necessary compromise on terms they may not be able to control and regarding an issue that is politically charged. Currently, there is no formal, coherent, multilateral institutional framework governing the global flow of migrants. While most actors agree that greater international cooperation on migration is needed, there has been no persuasive analysis of what form this would take or of what greater global cooperation would aim to achieve. The purpose of this book, the Transatlantic Council on Migration's fifth volume, is to fill this analytical gap by focusing on a set of fundamental questions: What are the key steps to building a better, more cooperative system of governance? What are the goals that can be achieved through greater international cooperation? And, most fundamentally, who (or what) is to be governed? This volume comprises national reports on

migration and migration law from 17 countries representing all continents. The vast majority of these are countries of immigration, which means they face specific challenges in terms of managing migratory flows that are increasingly linked with climate change and scarce natural resources worldwide, and they need to find viable ways to integrate humanitarian migration. Unlike so many recent publications in the field of international migration law, this book brings together reports on diverse countries that are rarely regarded as part of one and the same picture, depicting globalized migration in the contemporary era that to a large extent challenges state sovereignty. The contributions delineate the legal regimes that individual states are continually developing and modifying with a view to managing and controlling access of individual persons to their respective territories. They also show how the restrictive measures that states resort to in the event of failure to manage migration could have a lasting legal impact. The General Report preceding the country reports provides a comparative overview of the national reports, and is divided into two parts. The first, more technical in nature, addresses the classic questions relating to admission to and residence in a country. The second, more reflective section, examines the relationship between laws and migration in a wider and multidisciplinary perspective. To allow a robust comparison, the country reports all follow a similarly wide-ranging structure; to the extent possible, they also cover the historical, sociological and demographic factors that help explain legal regimes and migratory flows in each country. Each country report includes analyses of recent legislative developments and delicate questions that are still awaiting adequate (legal) responses as well as perspectives for the future. With a Foreword by Brunson McKinley, Director General of the International Organization for Migration (IOM) This book encapsulates the law of international migration by examining developments first addressed in the volume on Migration and International Legal Norms (edited by T.A. Aleinikoff and V. Chetail; T.M.C. Asser Press 2003) and by discussing wholly new themes. In this regard, the book considers emerging issues, such as the challenges posed by migration to State sovereignty and the protection of human rights as a result of the increasing tensions between anti-terrorism or security legislation and immigration measures, the impact of the use of biometrics technology (e.g. fingerprinting) to identify and better monitor international movements of persons, and enhanced cooperation on the European Union external border. The human rights of vulnerable groups of migrants, such as migrant workers, women, victims of trafficking, and stateless persons are also examined. The issue of forced migration warrants a consideration of the international migration law relating to groups such as internally displaced persons, as well as the international community's response to secondary movements of asylum-seekers. Questions of state responsibility concerning, for example, stranded migrants and provision of consular protection and assistance to migrants are also discussed. Moreover, the expansion of regional legal frameworks concerned with migration, such as EU immigration and asylum law and policy and the growing case law on European citizenship, as well as developments in free movement regimes in Africa, the Americas and the Caribbean, are added to the analysis of the growing body of international migration law. A range of persons from international organizations, legal practice and academia with expertise in International Migration Law have contributed to this volume, which is aimed at a broad audience, including policy makers, academics, researchers, postgraduate students, legal practitioners, civil society representatives and journalists. Ryszard Cholewinski is Labour Migration Specialist in the Migration Policy, Research and Communications Department of IOM, the International Organization for Migration, in Geneva. In the same organization, Richard Perruchoud is Director of the International Migration Law and Legal Affairs Department. Euan MacDonald holds a PhD in public international law from the European University Institute in Florence. Companion to : International migration law / Richard Plender, Rev. 2nd ed., 1988. Immigration, Emigration and Migration consists of essays written by distinguished scholars across the fields of law, political science, and philosophy that examine questions of travel and migration across national borders. Questions of immigration and border enforcement practices are particularly salient in contemporary public discourse, and examinations of policy and practice bring forth new philosophical quandaries. Why the common assumption that each country has the right to control its own borders? How are laws that restrict or regulate migration created and justified? Why has the criminalization of migration increased? How can migration be better considered through the point of view of the migrants themselves? What are the differences in international and national institutional migratory policy? The volume explores questions of border control and enforcement, criminalization of borders, and how to address current debates and changes in regards to migration and immigration. The intersection of analysis and prescription provides both an assessment of current forms of thought or regulation and suggestion of alterations to address the flaws or failures of present approaches. The eight essays in this volume reflect a variety of considerations and explorations across interdisciplinary lines, and provide a new and thought-provoking discussion of policy, practice, and philosophy of migratory and border practices. This Handbook focuses on the complexity surrounding the interaction between trade, labour mobility and development, taking into consideration social, economic and human rights implications, and identifies mechanisms for lawful movements across borders and their practical implementation. Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph on the rules on immigration and right of residence of non-nationals in United States examines the legal and administrative conditions for persons not having the citizenship of a State to enter the country and to stay and reside there. It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting. It follows the common structure of all monographs appearing in the International Encyclopaedia for Migration Law, thus allowing easy comparison between the country studies. As migration and economic activities are often interlinked, the analysis pays particular attention to labour market access and regulation of self-employed activities for non-nationals. The book describes the status of such specific categories of persons as students, researchers, temporary workers, and asylum seekers, as well as the position of family members, detailing applicable legislation and providing practical information on administrative procedures, sanctions, and legal remedies and guarantees. The impact of international human rights law and various bilateral and multilateral agreements is considered, along with the broader application of national and local law to non-citizens in such areas as family relations, labour, social security, and education. Lawyers, scholars, practitioners, policymakers, government administrations, and non governmental organizations involved in the development, practice and study of migration law will find this book indispensable. It will be welcomed by lawyers representing parties with interests in United States and immigration specialists in both public and private organizations. Academics and researchers also will appreciate its value in the study of comparative trends and harmonization initiatives affecting migrants. This collection brings together legal scholars and Christian theologians for an interdisciplinary conversation responding to the challenges of global migration. Gathering 14 leading scholars from both law and Christian theology, the book covers legal perspectives, theological perspectives, and key concepts in migration studies. In Part 1, scholars of migration law and policy discuss the legal landscape of migration at both the domestic and international level. In Part 2, Christian theologians, ethicists, and biblical scholars draw on the resources of the Christian tradition to think about migration. In Part 3, each chapter is co-authored by a scholar of law and a scholar of Christian theology, who bring their respective resources and perspectives into conversation through a conversation on key themes within migration studies. The work provides a truly interdisciplinary introduction to the topic of migration for those who are new to the subject; an opportunity for immigration lawyers and legal scholars to engage Christian theology; an opportunity for pastors and Christian theologians to engage law; and new insights on key frameworks for scholars who are already committed to the study of migration. Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph on the rules on immigration and right of residence of non-nationals in Poland examines the legal and administrative conditions for persons not having the citizenship of a State to enter the country and to stay and reside there. It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting. It follows the common structure of all monographs appearing in the International Encyclopaedia for Migration Law, thus allowing easy comparison between the country studies. As migration and economic activities are often interlinked, the analysis pays particular attention to labour market access and regulation of self-employed activities for non-nationals. The book describes the status of such specific categories of persons as students, researchers, temporary workers, and asylum seekers, as well as the position of family members, detailing applicable legislation and providing practical information on administrative procedures, sanctions, and legal remedies and guarantees. The impact of international human rights law and various bilateral and multilateral agreements is considered, along with the broader application of national and local law to non-citizens in such areas as family relations, labour, social security, and education. Lawyers, scholars, practitioners, policymakers, government administrations, and non governmental organizations involved in the development, practice and study of migration law will find this book indispensable. It will be

welcomed by lawyers representing parties with interests in Poland and immigration specialists in both public and private organizations. Academics and researchers also will appreciate its value in the study of comparative trends and harmonization initiatives affecting migrants. This collection has its origins in the recognition that there is a highly significant and under-considered intersection and interaction between migration law and labour law. It is the culmination of a collaborative project on 'Migrants at Work' funded by the John Fell Fund, the Society of Legal Scholars and the Research Centre at St John's College, Oxford. The collection aims to shed light on the interactions between immigration, migration law and labour law, in particular how migration status has a bearing on labour relations and the world of work. International Migration Law provides a detailed and comprehensive overview of the international legal framework applicable to the movement of persons across borders. The role of international law in this field is complex, and often ambiguous: there is no single source for the international law governing migration. The current framework is scattered throughout a wide array of rules belonging to numerous fields of international law, including refugee law, human rights law, humanitarian law, labour law, trade law, maritime law, criminal law, and consular law. This textbook therefore cuts through this complexity by clearly demonstrating what the current international law is, and assessing how it operates. The book offers a unique and comprehensive mapping of this growing field of international law. It brings together and critically analyses the disparate conventional, customary, and soft law on a broad variety of issues, such as irregular migration, human trafficking, refugee protection, labour migration, non-discrimination, regional free movement schemes, and global migration governance. It also offers a particular focus on important groups of migrants, namely migrant workers, refugees, and smuggled migrants. It maps the current status of the law governing their movement, providing a thorough critical analysis of the various stands of international law which apply to them, suggesting how the law may continue to develop in the future. This book provides the perfect introduction to all aspects of migration and international law. If the "field of global migration law explores transnational movement of people," modern international law emerges decidedly as an antagonist. Existing international law does a poor job of regulating international migration -- it authorizes too narrow a slice of the type of international movement that nonetheless occurs across the globe, and it contributes to the chaos and inhumanity that characterizes international migration outside the law. The root of international law's dysfunctional relationship with international mobility is this law's steadfast protection of the almost unfettered right of a state to exclude non-citizens. For scholars of international law within the field of global migration law, a pressing challenge remains a re-imagining of the relationship between the nation state and the non-national that destabilizes territorial exclusion as a fundamental feature of state sovereignty. In this essay, I propose that re-conceiving the movement of certain migrants across international borders today as decolonization offers a new and productive logic, ethics, and lens for international law's application to global migration. Migration has become business, big business. Over the last few decades a host of new business opportunities have emerged that capitalize both on the migrants' desires to migrate and the struggle by governments to manage migration. From the rapid growth of specialized transportation and labour immigration companies, to multinational companies managing detention centres or establishing border security, to the organized criminal networks profiting from human smuggling and trafficking, we are currently witnessing a growing commercialization of international migration. This volume claims that today it is almost impossible to speak of migration without also speaking of the migration industry. Yet, acknowledging the role the migration industry plays prompts a number of questions that have so far received only limited attention among scholars and policy makers. The book offers new concepts and theory for the study of international migration by bringing together cross-disciplinary theoretical explorations and original case studies. It also provides a global coverage of the phenomena under study, covering migrant destinations in Europe, the United States and Asia, and migrant sending regions in Africa, Asia and Latin America. Biometrics can be defined as the automated means of identifying an individual through the measurement of distinguishing physiological or behavioural traits. Biometric scanning is the process whereby biometric measurements are collected and enrolled in a computer system with the purpose of using the measurements to either verify or search for a person's identity. This particular publication focuses on the impact of the rapid expansion in the use of biometric systems in migration management on the rights of individuals; it seeks to highlight legal issues for consideration in implementing such systems, taking as the starting point that security interests of the state and the rights of the individual are not, and should not be, mutually exclusive. The book is divided into three chapters: Part 1: Understanding biometrics; Part 2: Biometrics, migration and security and Part 3: Human rights, implications of the use of biometrics in migration management. If you believe that States have complete discretion in handling migration matters and that migrants are not protected under international law, read this book. You will be amazed by the wealth of international instruments, treaties, standards and principles existing in international law. Rights and obligations of States, as well as rights and duties of migrants, are defined in a great number of legal instruments - some of them hard to find - stemming from various branches of law and constituting what is known as "international migration law". This publication assists readers - be they academics, students, practitioners, experts or migrants themselves - to better orientate themselves in this web of norms and principles existing at the international level. The focus of the Compendium is a comprehensive compilation of universal instruments with varying degrees of legal force - from authoritative international treaties, through customary international law, to the sets of principles and guidelines which, although non-binding, are nonetheless of clear contemporary relevance and can contribute to the progressive development of law in areas not yet covered by "hard" norms. To further this end, this book is being released as a companion to International Migration Law - Developing Paradigms and Key Challenges (edited by R. Cholewinski, R. Perruchoud and E. MacDonald and published by T.M.C. Asser Press, The Hague 2007), which shows how these norms have been applied and are developing in various concrete contexts. Richard Perruchoud is Director of the International Migration Law and Legal Affairs Department of the International Organization for Migration in Geneva. Katarína Tömölová is an Associate Legal Officer in the same Department of IOM.
