***Killing King Abacus Anthology** Dec 18 2019 New introductions by sasha k, Leila and Wolfi Landstreicher plus an anthology introduction Chris Kortright. This is an anthology of the writing tied to Killing King Abacus. Killing King Abacus was started as a writing project to challenge aspects of discourse and practices within the North American anarchist scene by three individuals Leila, sasha k and Wolfi Landstreicher. One of the central challenges of this project was to think through/explore “insurrectionary anarchism” as a practice/process. This anthology spans a time between 2000-2005 covering Killing King Abacus #1 and #2; Hot Tide Bulletin which is comprised of anti-authoritarian/anti-capitalist analysis; an exchange between sasha k and Chris Dixon debating/dialoging issues of organization; the role of “activists” and “political experts”; a collection of letters and articles in other publication that where in response to or in discussion with the larger Killing King Abacus project.*

***Communism in the 21st Century** [3 volumes] Sep 19 2022 A compelling three-volume exploration of the philosophical, social, and political facets of the theory and practice of communism within the conditions of 21st-century world politics and late capitalism. • Presents viewpoints from leading Marxist philosophers, economists, and historians alongside those from experts critical of communist ideas to provide a balanced, diverse collection on modern communism • Re-examines established debates within communist and radical politics to show how these discussions have been reconfigured to how communism is currently situated in world politics and may develop in the future • Explores Marx's vision from various interpretive backgrounds, including the socialist, economic, humanist, cosmopolitan, post-modern, feminist, environmental, and cultural, to engage a wide readership: students, academics, activists, and laypersons*

***The Ashgate Research Companion to War** Mar 21 2020 Many different social scientists have been challenged by the origins of wars, their immediate causes and the mechanisms leading to the breakdown of peaceful relations. Many have speculated whether conflicts were avoidable and whether alternative policies might have prevented conflict. The Ashgate Research Companion to War provides contributions from a number of theorists and historians with a focus on long term, systemic conflicts. The problématique is introduced by the Editors highlighting the need for interdisciplinary approaches to the study of war as a global phenomenon. The following 29 essays provide a comprehensive study guide in four sections: Part I explicates differing theories as to the origins of war under the general concept of 'polemology'. Part II analyzes significant conflicts from the Peloponnesian wars to World War II. Part III examines the ramifications of Cold War and post-Cold War conflict. Part IV looks at long cycles of systemic conflict, and speculates, in part, whether another global war is theoretically possible, and if so, whether it can be averted. This comprehensive volume brings us a much needed analysis of wars throughout the ages, their origins, their consequences, and their relationship to the present. A valuable understanding that is ideal for social scientists from a variety of backgrounds.*

***A Book about the Film Monty Python and the Holy Grail** Nov 21 2022 This exhaustive reference identifies and explains the plethora of cultural, historical, and topical allusions in the film Monty Python and the Holy Grail, the first original film by the British comedy troupe.*

***Protest, Property and the Commons** Oct 08 2021 Protest, Property and the Commons focuses on the alternative property narratives of ‘social centres’, or political squats, and how the spaces and their communities create their own – resistant – form of law. Drawing on critical legal theory, legal pluralism, legal geography, poststructuralism and new materialism, the book considers how protest movements both use state law and create new, more informal, legalities in order to forge a practice of resistance. Invaluable for anyone working within the area of informal property in land, commons, protest and adverse possession, this book offers a ground-breaking account of the integral role of time, space and performance in the instituting processes of law and resistance.*

***From Crisis to Communitisation** Aug 18 2022 “Communitisation” means something quite straightforward: a revolution that starts to change social relations immediately. It would extend over years, decades probably, but from Day One it would begin to do away with wage-labour, profit, productivity, private property, classes, States, masculine domination, and more. There would be no “transition period” in the Marxist sense, no period when the “associated producers” continue furthering economic growth to create the industrial foundations of a new world. Communitisation means a creative insurrection that would bring about communism, not its preconditions. Thus stated, it sounds simple enough. The questions are what, how, and by whom. That is what this book is about. Communitisation is not the be-all and end-all that solves everything and proves wrong all past critical theory. The concept was born out of a specific period, and we can fully understand it by going back to how people personally and collectively experienced the crises of the 1960s and '70s. The notion is now developing in the maelstrom of a new crisis, deeper than the Depression of the 1930s, among other reasons because of its ecological dimension, a crisis that has the scope and magnitude of a crisis of civilisation. This is not a book that glorifies existing struggles as if their present accumulation were enough to result in revolution. Radical theory is meaningful if it addresses*

the question: How can proletarian resistance to exploitation and dispossession achieve more than aggravate the crisis? How can it reshape the world?

Reproducing Refugees Feb 12 2022 Since 2015, the 'refugee crisis' is possibly the most photographed humanitarian crisis in history. Photographs taken, for instance, in Lesbos, Greece, and Bodrum, Turkey, were instrumental in generating waves of public support for, and populist opposition to "welcoming refugees" in Europe. But photographs do not circulate in a vacuum; this book explores the visual economy of the 'refugee crisis,' showing how the reproduction of images is structured by, and secures hierarchies of gender, sexuality, and 'race,' essential to the functioning of bordered nation-states. Taking photography not only as the object of research, but innovating the method of photographia— the material trace of writing/ grafi with light/ phos— this book urges us to view images and their reproduction critically. Part theoretical text, part visual essay, *Reproducing Refugees* vividly shows how institutional violence underpins both the spectacularity and the banality of 'crisis.' This book goes about synthesising visual studies with queer, feminist, postcolonial, post-structuralist, and post-Marxist theories: *Reproducing Refugees: Photographia of a Crisis* offers theoretical frameworks and methodological tools to critically analyse representations, both those circulated through hegemonic institutions, and those generated from 'below'. It carves a space between logos and praxis, ways of knowing and ways of doing, by offering a new visual language that problematises reified categories such as that of the 'refugee' and makes possible disruptive, alternative, resistant perceptions. The book contributes to the fields of migration and border studies, critically engaging visual narratives drawn from migration movements to question dominant categories and frameworks, from a decolonial, no-borders, queer feminist perspective.

Violent Non-state Actors and the Syrian Civil War Oct 28 2020 This book sheds new light on the security challenges for failed states posed by violent non-state armed actors (VNSAs). By focusing on the Syrian Civil War, it explores the characteristics, ideologies and strategies of the Islamic State (ISIS) and the People's Protection Units (YPG), as well as the regional and geopolitical impacts of these VNSAs. The contributors also cover topics such as the re-imagining of borders, the YPG's demands for national sovereignty, and the involvement of regional and global powers in the Syrian crisis. "This timely volume by regional scholars and experts examines various aspects of the emergence and expansion of violent non-state actors in the Syrian/Iraqi conflict. The wealth of detail and approaches enhance our understanding of the transformation and dynamics of contemporary conflicts within and beyond the region." Keith Krause, *The Graduate Institute, Geneva* "This book opens fascinating glimpses into contrasting forms of "state-like" governance established by non-state actors, ISIS and the Kurdish PYD. [...] It is an important source for students of the Syrian conflict, civil wars, failed states and hybrid governance." Raymond Hinnebusch, *Director Centre for Syrian Studies, University of St. Andrews* "This book is an excellent resource for those looking for an interdisciplinary account of VNSAs during the Syrian civil war. It makes a nice contribution to the study of violent non state actors and poses a set of new and pressing questions." Max Abrahms, *Northeastern University*.

Petrocultures Jan 19 2020 Contemporary life is founded on oil – a cheap, accessible, and rich source of energy that has shaped cities and manufacturing economies at the same time that it has increased mobility, global trade, and environmental devastation. Despite oil's essential role, full recognition of its social and cultural significance has only become a prominent feature of everyday debate and discussion in the early twenty-first century. Presenting a multifaceted analysis of the cultural, social, and political claims and assumptions that guide how we think and talk about oil, *Petrocultures* maps the complex and often contradictory ways in which oil has influenced the public's imagination around the world. This collection of essays shows that oil's vast network of social and historical narratives and the processes that enable its extraction are what characterize its importance, and that its circulation through this immense web of relations forms worldwide experiences and expectations. Contributors' essays investigate the discourses surrounding oil in contemporary culture while advancing and configuring new ways to discuss the cultural ecosystem that it has created. A window into the social role of oil, *Petrocultures* also contemplates what it would mean if human life were no longer deeply shaped by the consumption of fossil fuels.

New Spirits of Capitalism? Aug 06 2021 This text explores the nature and effects of contemporary capitalism through engaging with Boltanski and Chiapello's seminal text, 'The New Spirit of Capitalism'. It provides a comprehensive overview and interrogation of the text and develops new insights into contemporary neo-liberal or 'financialized' capitalism.

Human, All Too (Post)Human Aug 26 2020 Humanism views the human as the conscious subject of free will against the non-human periphery. Posthumanism puts forth a major change to humanism by undoing the separation of human from non-human. *Human, All Too (Post)Human* argues humanism and post-humanism both normalize capitalism, the obstacle to social change. The book makes the case that real change is ending class relations to free humanity from wage labor and place human and non-human in a new order of being.

Moral Pressure for Responsible Globalization Dec 10 2021 In *Moral Pressure for Responsible Globalization*, Steiner offers an account of religious diplomacy with the G8/G7 and G20 to evoke new possibilities to steer globalization in more equitable and sustainable directions in the Age of the Anthropocene.

The Democracy of Suffering Mar 01 2021 In The Democracy of Suffering philosopher Todd Dufresne provides a strikingly original exploration of the past, present, and future of this epoch, the Anthropocene, demonstrating how the twin crises of reason and capital have dramatically remade the essential conditions for life itself. Images, cartoons, artworks, and quotes pulled from literary and popular culture supplement this engaging and unorthodox look into where we stand amidst the ravages of climate change and capitalist economics. With humour, passion, and erudition, Dufresne diagnoses a frightening new reality and proposes a way forward, arguing that our serial experiences of catastrophic climate change herald an intellectual and moral awakening - one that lays the groundwork, albeit at the last possible moment, for a future beyond individualism, hate, and greed. That future is unapologetically collective. It begins with a shift in human consciousness, with philosophy in its broadest sense, and extends to a reengagement with our greatest ideals of economic, social, and political justice for all. But this collective future, Dufresne argues, is either now or never. Uncovering how we got into this mess and how, if at all, we get out of it, The Democracy of Suffering is a flicker of light, or perhaps a scream, in the face of human extinction and the end of civilization.

Eyes to the South Jan 31 2021 A comparative study of the porous intellectual and political borders between a colonial power and the colonized.

Not Bored! Anthology 1983-2010 Oct 20 2022 Massive anthology of essays and illustrations published in NOT BORED! between 1983 and 2010.

China: From Permanent Revolution to Counter-Revolution Mar 13 2022 This book is a comprehensive analysis of the revolutionary history of China, from the early 20th century to the present era of crisis, aided by a wealth of research which cuts across the many historical distortions both of bourgeois academia and of the Chinese Communist Party. This book answers the questions: What was the class composition and class nature of the Chinese Communist Party when it took power in 1949? What forces pushed the Mao regime, despite its explicitly class-collaborationist strategy, to take measures which were objectively socialist and to establish the Chinese workers' state? The Chinese Revolution was a practical test of both Trotsky's theory of permanent revolution and Mao's theory of uninterrupted revolution by stages. Which theory matched reality? The degeneration of the Chinese People's Republic to capitalism has been a second rigorous practical test of Trotsky's analyses. Has his prognosis that without a political revolution to overthrow the regime, a Stalinist bureaucratic state would return to capitalism, been proved correct?

Dictator, the Revolution, the Machine Apr 21 2020 It is a commonplace wisdom that from the authoritarian roots of the Bolshevik revolution in 1917 grew the gulags and the police state of the Stalinist epoch. The Dictator, the Revolution, The Machine overturns that perspective once and for all by showing how October was inspired by a profound mass movement comprised of urban workers and rural poor -- a movement that went on to forge a state capable of channelling its political will in and through the most overwhelming form of grass-roots democracy history has ever known. It was a single, precarious experiment whose life was tragically brief. In a context of civil war and foreign invasion the fledgling democracy was eradicated and the Bolshevik party was denuded of its social basis -- the working classes. While the party survived, its centrist elements came to the fore as the power of the bureaucracy asserted itself. From the ashes of human freedom there arose a zombified, sclerotic administration in which state functionaries took precedence over elected representatives. One man came to embody the inverted logic of this bureaucratic machine, its remorseless brutality and its parasitic drive for power. Joseph Stalin was its highest expression, accruing to himself state powers as he made his murderous, heady rise to dictator. This book examines his historical profile, its roots in Georgian medievalism, and shows why Stalin was destined to play the role he did. In broader strokes Tony McKenna raises the conflict between the revolutionary movement and the bureaucracy to the level of a literary tragedy played out on the stage of world history, showing how Stalinism's victory would pave the way for the Midnight of the Century.

The Peace Protestors Jun 16 2022 From Afghanistan to the Falklands, from Northern Ireland to Iraq, British troops are nearly always in action somewhere in the world. But whenever there is war, there will be people who resist it. Sometimes, they can draw on public sympathy. At other times, they stand alone against the crowd. Peace movements large and small have been a constant part of UK history, not least in the last 40 years. This book tells their stories. Drawing on interviews, fresh research and newly released government documents, the book sheds light on some of the most surprising and overlooked events of recent decades. Peace activists in the 1980s did not know that Margaret Thatcher's government feared that US troops on UK bases would fire on unarmed demonstrators. When the ceasefire came about in Northern Ireland, few noticed the peace work that Quakers had been doing behind the scenes for years. While the jingoistic atmosphere of the Falklands War is much remembered, there is less talk about the protests against it that saw more than 100 arrests at navy recruitment centres and public demonstrations. Four women who successfully disarmed a warplane in the 1990s were just a few of those to be acquitted after actions that could have resulted in years in prison. Apparent public support for the campaign against the Iraq war masked deep and bitter divisions amongst anti-war activists. Dissent and disobedience within the armed forces continues far from the public gaze. As recently as 2011, Michael Lyons was refused discharge from the Royal Navy despite developing a conscientious objection to war. He spent seven months in a military prison. This is a book

that brings to life the realities of resistance by people whose refusal to conform has much to say about how we see the UK and British history today.

That Option No Longer Exists Nov 09 2021 It is time to look afresh at the 1970s. It was not a grey decade of decline, defeat and power blackouts. Bursting with cultural experimentation, sexual liberation and industrial militancy, the 1970s saw the ruling elites of Britain challenged at every level, most especially by a Labour left led by Tony Benn which aimed to effect a "fundamental and irreversible shift in the balance of wealth and power in favour of working people". That Option No Longer Exists reveals a hidden history - how Benn and the left tried to reform British industry, to introduce democracy in the workplace and overturn the power of Finance; and how Whitehall, the security services and the City fought back, paving the way for Thatcher to re-establish the rule of money and the markets. Britain almost took a different path in 1974-76 to that of massive wealth inequality, the dominance of the City, and the slow death of the welfare state. This is the story of a struggle within government almost forgotten, and of a tragic turning point in British history.

Corporal Rhetoric Apr 14 2022 "Examines public discourse from the Progressive Era over the state's right to regulate women's bodies and their reproduction"--

Social Media Materialities and Protest Jan 23 2023 Far from being neutral, social media platforms – such as Facebook, Twitter, YouTube, and WeChat – possess their own material characteristics, which shape how people engage, protest, resist, and struggle. This innovative collection advances the notion of social media materialities to draw attention to the ways in which the wires and silicon, data streams and algorithms, user and programming interfaces, business models and terms of service steer contentious practices and, inversely, how technologies and economic models are handled and performed by users. The key question is how the tension between social media's techno-commercial infrastructures and activist agency plays out in protest. Addressing this, the volume goes beyond singular empirical examples and focuses on the characteristics of protest and social media materialities, offering further conceptualizations and guidance for this emerging field of research. The various contributions explore a wide variety of activist projects, protests, and regions, ranging from Occupy in the USA to environmental protests in China, and from the Mexican Barrio Nómada to the Copenhagen-based activist television channel TV Stop (1987–2005).

Anarchism Sep 07 2021 Anarchism is by far the least broadly understood ideology and the least studied academically. Though highly influential, both historically and in terms of recent social movements, anarchism is regularly dismissed. Anarchism: A Conceptual Approach is a welcome addition to this growing field, which is widely debated but poorly understood. Occupying a distinctive position in the study of anarchist ideology, this volume – authored by a handpicked group of established and rising scholars – investigates how anarchists often seek to sharpen their message and struggle to determine what ideas and actions are central to their identity. Moving beyond defining anarchism as simply an ideology or political theory, this book examines the meanings of its key concepts, which have been divided into three categories: Core, Adjacent, and Peripheral concepts. Each chapter focuses on one important concept, shows how anarchists have understood the concept, and highlights its relationships to other concepts. Although anarchism is often thought of as a political topic, the interdisciplinary nature of Anarchism: A Conceptual Approach makes it of interest to students and scholars across the social sciences, liberal arts, and the humanities.

Movements in Time Jan 11 2022 2011 was a tumultuous year in terms of social protest movements. The Occupy movement spread across the globe with unprecedented support of an enormity not seen since 1968, while revolutions in Egypt, Tunisia, Morocco, Syria and Libya caught the attention of the global media and brought the word "revolution" back into public discussions on social justice and governance. For many people worldwide, it appears that it is time for social, political and economic change. And it is precisely time, in all its forms, which cannot be ignored in this context. As something that surrounds us and affects every aspect of our lives, time is at once a tool for control, for order, for emancipation, for understanding the future and the past, and measuring degrees of freedom and quality of life in the present. This book brings together essays from fields such as politics, cultural studies and philosophy in order to reinterpret and reorient current thinking on the possibilities for new understandings of concepts of time to bring about social change. History as the passing of time, clock time, the exchange value of time, qualitative time, and alternative or marginal notions of temporality are analysed through the lens of various theoretical thinkers and applied to a multitude of political and social case studies. Breaking away from traditional notions of time as linear, and against common socially-constructed understandings of time, these essays suggest that new conceptions of time can have a major influence on creating a more just, tolerant world.

Protests as Events May 15 2022 Protests as Events: Politics, Activism and Leisure is an edited collection that explores activism as a leisure activity and protests as events.

Lost Goddesses May 03 2021 Porn is a complex symbol of our current world, and a shining example of the 'Shadow' of the Western culture. While many books essentially show its negative sides, the risks of addiction, the danger of damaging the relationship between sexes, and so on, this work focuses on porn as a phenomenon of our times, exploring its several colours, and trying to capture its inner logic and essence. Despite its pervasive ubiquity in the internet and in the lives of many, porn is apparently the ultimate taboo in the consulting room: in fact, very rarely does a patient mention something

detailed about his or her use of porn. In parallel with its growing presence, the last forty years have witnessed a significant growth of publications about porn. The present work aims at deepening some aspects of internet porn from the perspective of Analytical Psychology, seeing it as symbol of the complexity of the human psyche, emerged in a specific moment of the history of consciousness.

The Bloomsbury Companion to Marx Jun 23 2020 There are very few figures in history that have exerted as much and as varied an influence as Karl Marx. His work represents an unrivalled intervention into fields as various as philosophy, journalism, economics, history, politics and cultural criticism. His name is invoked across the political spectrum in connection to revolution and insurrection, social justice and economic transformation. *The Bloomsbury Companion to Marx* is the definitive reference guide to Marx's life and work. Written by an international team of leading Marx scholars, the book offers comprehensive coverage of Marx's: life and contexts; sources, influences and encounters; key writings; major themes and topics; and reception and influence. The defining feature of this Companion is its attention to the new directions in Marxism that animate the theoretical, scientific, and political sides of Marx's thought. Gender and the growing importance of Marxist-feminism is treated as equally important to clarifying Marx today as traditional and diverse categories of critique such as class, capital, and mode of production. Similarly, this Companion showcases the methodological and political importance of Marxism to environmentalist politics. Finally, the volume examines in detail non-European Marxisms, demonstrating the centrality of Marxist thought to political movements both within and beyond the global north. This book is the ideal research resource for anyone working on Marx and his ideas today, and as an entry point, if you are approaching Marx's thought for the first time.

Totality Inside Out Jul 17 2022 However divergent their analyses may be in other ways, some prominent anti-capitalist critics have remained critical of contemporary debates over reparative justice for groups historically oppressed and marginalized on the basis of race, gender, sexual identity, sexual preference, and/or ability, arguing that the most these struggles can hope to produce is a more diversity-friendly capital. Meanwhile, scholars of gender and sexuality as well as race and ethnic studies maintain that, by elevating the socioeconomic above other logics of domination, anti-capitalist thought fails to acknowledge specific forms and experiences of subjugation. The thinkers and activists who appear in *Totality Inside Out* reject this divisive logic altogether. Instead, they aim for a more expansive analysis of our contemporary moment to uncover connected sites of political struggle over racial and economic justice, materialist feminist and queer critique, climate change, and aesthetic value. The re-imagined account of capitalist totality that appears in this volume illuminates the material interlinkages between discrepant social phenomena, forms of oppression, and group histories, offering multiple entry points for readers who are interested in exploring how capitalism shapes integral relations within the social whole. Contributors: Brent Ryan Bellamy, Sarah Brouillette, Sarika Chandra, Chris Chen, Joshua Clover, Tim Kreiner, Arthur Scarritt, Zoe Sutherland, Marina Vishmidt

Handbook of International Trade Agreements Jul 05 2021 International trade has, for decades, been central to economic growth and improved standards of living for nations and regions worldwide. For most of the advanced countries, trade has raised standards of living, while for most emerging economies, growth did not begin until their integration into the global economy. The economic explanation is simple: international trade facilitates specialization, increased efficiency and improved productivity to an extent impossible in closed economies. However, recent years have seen a significant slowdown in global trade, and the global system has increasingly come under attack from politicians on the right and on the left. The benefits of open markets, the continuation of international co-operation, and the usefulness of multilateral institutions such as the World Trade Organization (WTO), International Monetary Fund and World Bank have all been called into question. While globalization has had a broadly positive effect on overall global welfare, it has also been perceived by the public as damaging communities and social classes in the industrialized world, spawning, for example, Brexit, and the US exit from the Transpacific Partnership. The purpose of this volume is to examine international and regional preferential trade agreements (PTAs), which offer like-minded countries a possible means to continue receiving the benefits of economic liberalization and expanded trade. What are the strengths and weaknesses of such agreements, and how can they sustain growth and prosperity for their members in an ever-challenging global economic environment? The Handbook is divided into two parts. The first, *Global Themes*, offers analysis of issues including the WTO, trade agreements and economic development, intellectual property rights, security and environmental issues, and PTAs and developing countries. The second part examines regional and country-specific agreements and issues, including NAFTA, CARICOM, CETA, the Pacific Alliance, the European Union, EFTA, ECOWAS, the SADC, TTIP, RCEP and the TPP (now the CPTPP), as well as the policies of countries such as Japan and Australia.

Annotated Bibliography of Papers Using the General Social Surveys Nov 16 2019

Rethinking Utopia Apr 02 2021 Over five hundred years since it was named, utopia remains a vital concept for understanding and challenging the world(s) we inhabit, even in – or rather because of – the condition of 'post-utopianism' that supposedly permeates them. In *Rethinking Utopia* David M. Bell offers a diagnosis of the present through the lens of utopia and then, by rethinking the concept through engagement with utopian studies, a variety of 'radical' theories and the

need for decolonizing praxis, shows how utopianism might work within, against and beyond that which exists in order to provide us with hope for a better future. He proposes paying a 'subversive fidelity' to utopia, in which its three constituent terms: 'good' (eu), 'place' (topos), and 'no' (ou) are rethought to assert the importance of immanent, affective relations. The volume engages with a variety of practices and forms to articulate such a utopianism, including popular education/critical pedagogy; musical improvisation; and utopian literature. The problems as well as the possibilities of this utopianism are explored, although the problems are often revealed to be possibilities, provided they are subject to material challenge. Rethinking Utopia offers a way of thinking about (and perhaps realising) utopia that helps overcome some of the binary oppositions structuring much thinking about the topic. It allows utopia to be thought in terms of place and process; affirmation and negation; and the real and the not-yet. It engages with the spatial and affective turns in the social sciences without ever uncritically being subsumed by them; and seeks to make connections to indigenous cosmologies. It is a cautious, careful, critical work punctuated by both pessimism and hope; and a refusal to accept the finality of this or any world.

Trans Sex Feb 18 2020 Shortlisted for the Lambda Literary best Trans Non-Fiction Award 2022! Winner of the AASECT Book Award for Sexuality Professionals 2022! Despite the increasing visibility of trans and non-binary folx in media, political representation, and popular culture, their sexual lives and erotic embodiments are woefully under-attended-to in both scholarship and clinical practice. The aim of this book is to equip providers with both conceptual frameworks and concrete tools for better engaging their trans, non-binary, and gender expansive clients in pleasure-centered discussions of sexual health. Challenging the dominant images of trans sexualities that appear in the existing literature, such as an emphasis on avoiding gender dysphoria, the preservation of sexual function, or on sexual losses that may arise as a result of transition pathways, Trans Sex offers a pleasure-positive approach to working with trans clients. Providing concrete clinical practices and practical activities that utilize social justice, intersectional trans feminism, and radical queer theory as key conceptual frameworks, this groundbreaking text is designed to be accessible to a wide range of providers. This book draws on Fielding's experiences as both a trans client/patient and as a therapist to shift and expand the conversation and includes contributions from other trans and non-binary providers working at the intersection of gender-affirmative care and sexuality. Trans Sex seeks to move trans sexualities from the margins of gender-affirmative clinical practice, to center pleasure, and to spark creativity and empathic attunement within the client-provider relationship. Whether they be mental health or medical providers, trainees, or seasoned practitioners in gender-affirmative work or sexualities, readers will be able harness creative strategies to enhance their practice and become more imaginative providers.

Working Class History Feb 24 2023 History is not made by kings, politicians, or a few rich individuals—it is made by all of us. From the temples of ancient Egypt to spacecraft orbiting Earth, workers and ordinary people everywhere have walked out, sat down, risen up, and fought back against exploitation, discrimination, colonization, and oppression. Working Class History presents a distinct selection of people's history through hundreds of "on this day in history" anniversaries that are as diverse and international as the working class itself. Women, young people, people of color, workers, migrants, Indigenous people, LGBT+ people, disabled people, older people, the unemployed, home workers, and every other part of the working class have organized and taken action that has shaped our world, and improvements in living and working conditions have been won only by years of violent conflict and sacrifice. These everyday acts of resistance and rebellion highlight just some of those who have struggled for a better world and provide lessons and inspiration for those of us fighting in the present. Going day by day, this book paints a picture of how and why the world came to be as it is, how some have tried to change it, and the lengths to which the rich and powerful have gone to maintain and increase their wealth and influence. This handbook of grassroots movements, curated by the popular Working Class History project, features many hidden histories and untold stories, reinforced with inspiring images, further reading, and a foreword from legendary author and dissident Noam Chomsky.

America's Forgotten Terrorists May 23 2020 Jeffrey D. Simon tells the gripping story of the forgotten terrorist group the Galleanists, a fiery brand of Italian anarchists in the United States during the early 1900s, many of whose tactics are still used today.

Mute Compulsion Oct 16 2019 A new Marxist theory of the abstract and impersonal forms of power in capitalism Despite insoluble contradictions, intense volatility and fierce resistance, the crisis-ridden capitalism of the 21st century lingers on. To understand capital's paradoxical expansion and entrenchment amidst crisis and unrest, Mute Compulsion offers a novel theory of the historically unique forms of abstract and impersonal power set in motion by the subjection of social life to the profit imperative. Building on a critical reconstruction of Karl Marx's unfinished critique of political economy and a wide range of contemporary Marxist theory, philosopher Søren Mau sets out to explain how the logic of capital tightens its stranglehold on the life of society by constantly remoulding the material conditions of social reproduction. In the course of doing so, Mau intervenes in classical and contemporary debates about the value form, crisis theory, biopolitics, social reproduction, humanism, logistics, agriculture, metabolism, the body, competition, technology and relative surplus populations.

When Riot Cops Are Not Enough Dec 30 2020 In When Riot Cops Are Not Enough, sociologist and activist Mike King

examines the policing, and broader political repression, of the Occupy Oakland movement during the fall of 2011 through the spring of 2012. King's active and daily participation in that movement, from its inception through its demise, provides a unique insider perspective to illustrate how the Oakland police and city administrators lost the ability to effectively control the movement. Drawn from King's intensive field work, the book focuses on the physical, legal, political, and ideological dimensions of repression—in the streets, in courtrooms, in the media, in city hall, and within the movement itself—When Riot Cops Are Not Enough highlights the central role of political legitimacy, both for mass movements seeking to create social change, as well as for governmental forces seeking to control such movements. Although Occupy Oakland was different from other Occupy sites in many respects, King shows how the contradictions it illuminated within both social movement and police strategies provide deep insights into the nature of protest policing generally, and a clear map to understanding the full range of social control techniques used in North America in the twenty-first century.

Autonomy Dec 22 2022 Autonomy: Capital, Class and Politics explores and critiques one of the most dynamic terrains of political theory, sometimes referred to as 'Autonomist Marxism' or post-Operaismo. This theory shot to prominence with the publication of Empire by Hardt and Negri and has been associated with cutting edge developments in political and cultural practice; yet there exists no work that critically examines it in its contemporary breadth. Taking three divergent manifestations of Autonomist Marxism found in the works of Antonio Negri and Paulo Virno, the Midnight Notes Collective and John Holloway, David Eden examines how each approach questions the nature of class and contemporary capitalism and how they extrapolate politics. Not only is such juxtaposition both fruitful and unprecedented but Eden then constructs critiques of each approach and draws out deeper common concerns. Suggesting a novel rethinking of emancipatory praxis, this book provides a much needed insight into the current tensions and clashes within society and politics.

Revolution, Not Reform Nov 28 2020 With civilization on the brink of collapse, a lot of the blame has been put on the average citizen, but there's been nowhere near enough discussion about timely solutions and what they can do to help. Among the discussion that does happen is a renewed interest in the idea of socialism. But hasn't that already been attempted? Is Bernie Sanders trying to turn America into the next Venezuela, or could socialism actually save humanity?

The Coming Revolution Jun 04 2021 A technological revolution is driving capitalism toward crisis and collapse. Can our society evolve in time to rescue the future? Radical advances in automation, robotics, and computer technology have thrown millions out of work and will only continue to do so in the years to come. At the same time, cheap, individually-accessible machines will wrestle for primacy with both gleaming highly-automated factories and sweatshops alike, ultimately eroding the dominance of industrial production. Economic growth is slowing down, and it is not going to speed up again. The pressures fueling today's global unrest will not go away and are only going to get worse as wages stagnate in many countries, solid employment becomes harder to find, and cuts to social benefits continue. Competing radical and reactionary ideologies will clash as political consensus crumbles and the world's peoples search for answers to these challenges. In its opening decades, the 21st will be a century of war and revolution. By the end of the 21st century, capitalism will be consigned to the history books. Despite the seeming darkness of our era, our future is filled with incredible possibility. If working people join together, we can create a world of freedom, beauty, and abundance, where poverty and tyranny are merely distant memories for our grandchildren. This is the story of The Coming Revolution.

Cities Without Capitalism Jul 25 2020 This book explores the interconnections between urbanization and capitalism to examine the current condition of cities due to capitalism. It brings together interdisciplinary insights from leading academics, activists and researchers to envision progressive, anti-capitalist changes for the future of cities. The exploitative nature of capitalist urbanization, as seen in the manifestation of modern cities, has threatened and affected life on Earth in unprecedented ways. This book unravels these threats to ecosystems and biodiversity and addresses the widening gap between the rich and the poor. It considers the future impacts of the capitalist urbanization on the planet and the generations to come and offers directions to imagine and build de-capitalised and de-urbanised cities to promote environmental sustainability. Written in lucid style, the chapters in the book illustrate the current situation of capitalist urbanization and expose how it exploits and consumes the planet. It also looks at alternative habitat practices of building autonomous and ecological human settlements, and how these can lead to a transformation of capitalist urbanization. The book also includes current debates on COVID-19 pandemic to consider post-pandemic challenges in envisioning a de-capitalised, eco-friendly society in the immediate future. It will be useful for academics and professionals in the fields of sociology, urban planning and design and urban studies.

Employment Relations in Financial Services Sep 26 2020 This book describes and analyses the impact of the 2007-2008 financial crisis upon the working conditions of employees in the financial services sector in Britain. It tells the story of workers being made to pay the price for a crisis that was not of their own making, but nevertheless caused a deleterious impact on their employment security, remuneration and working conditions. Evidence of fighting back against this has been sparse so that the response of employees is best characterised as 'fright' (grudgingly working harder and longer), 'flight' (leaving the sector through redundancy), and 'falling in line' (accepting the diktat of performance managements systems).

*Through this book we learn the reasons behind this acquiescence, with its detailed attention to topics such as the stunted development of labour unionism, the prevalence of union-management partnerships, and the occurrence of employment insecurity and labour shedding. Providing a valuable insight into the effects of the financial crash, *Employment Relations in Financial Services* will be useful to academics, students and also trade unionists.*
