"In Beyond the Prado, Selma Reuben Holo argues that Spanish state and regional leaders consciously used the power of museums to foster democratic identity in the country's citizens. In case studies such as the Guggenheim Museum Bilbao, the Sephardic Museum in Toledo, and IVAM, the modern and contemporary art museum in Valencia, she tells how museums and their exhibitions have touched off vigorous debates around such issues as Basque autonomy, the relationship of art museums and politics, Catalan identity, and the opposing pull of local and global cultures. Holo chronicles how neglect of the Prado and government acquisition of the renowned Thyssen-Bornemisza Collection have affected Spain's public image and describes the controversies surrounding Picasso's Guernica."--BOOK JACKET. Inappropriate health care is an escalating and expensive problem. It affects high income, middle income, and low income countries and wastes billions of dollars annually as well as harming individuals and communities. Inappropriate care refers to both the overuse and underuse of tests and treatments and, ironically, can occur concurrently within the same health system. Even though patient-centred care is still the prevailing ethos, specifying where patients should be situated geographically has not required health professionals to consider the preferences, values, and priorities of patients when making treatment decisions. Patient-perspective care demands that the decisions health professionals make are in the service of patient's goals. Health care, ultimately, is helping individuals to live the lives they would wish for themselves. In order to meet this imperative, health professionals must work towards understanding what their patients would like to achieve through their engagement with health services. This book details the extent and scope of inappropriate care and how we have arrived in this position. The necessity for patient-perspective care is outlined and provides a theoretical framework that explains why patient-perspective care is so critical. The implications of this theory are then explored and specific strategies for moving towards a patient-perspective approach are discussed. This book is entirely original and describes a novel, fresh approach to delivering health services. Many long-standing and expensive problems such as missed appointments will disappear and patients will be more satisfied with the treatments they receive. Health services generally will be more efficient and effective leading to more sustainable and affordable health care. Car Land Cruiser Prado, manufactured by Toyota since 1987. The cost of the car was not small, but comfortable ride, excellent off-road performance and build quality have made the car very popular. The second generation of the family Toyota began to produce in 1996. The car was named the Toyota Prado 90. Repair and maintenance of cars were also held in firm service centers throughout Japan, as well as beyond its borders - Toyota Prado 90 gained increasing popularity in other countries. The third generation of the family of Prado was released in 2002 - today it is the most common brands of cars Toyota Prado. This generation has been called the Toyota Prado 120. Het 80/20-principe klinkt als een aardige vuistregel, maar het is meer dan dat: het is een wetenschappelijk bewezen principe. Richard Koch toont in dit boek aan dat het 80/20-principe voor organisaties te gebruiken is als analyse-instrument (met welke producten behalen we de hoogste winst?), en op persoonlijk vlak als denkmethode (op welke thema's moet ik focussen, wat zijn de beste oplossingen?). In beide gevallen is het resultaat: betere beslissingen, minder gedoe, meer effectiviteit. Op strategisch niveau, maar ook in je dagelijkse werk. Iedereen, van de CEO tot de professional, kan met dit boek zijn voordeel doen. Het helpt je te kiezen, te beslissen en sneller vooruit te komen. De jubileumeditie van dit standaardwerk is aangevuld met nieuwe hoofdstukken over de werking van het principe in (online) netwerken. This repair manual has been prepared to provide information covering general service repairs for the 5VZ-FE engine equipped in the Toyota Land Cruiser /Land Cruiser Prado. Application models: VZJ90, 95 series. In this work Susan Socolow examines bureaucrats in early modern society by concentrating on those of Buenos Aires under the Bourbon reforms in the late colonial bureaucracy, Socolow studies the individuals who held positions in the colonial civil service—their recruitment, aspirations, job tenure, professional advancement, and economic position. The late eighteenth century was a critical time for the southernmost regions of Latin America, for in this period they became a separate political entity, the Viceroyalty of the Rio de la Plata. Socolow's work, part of a continuing study of the political, economic, and social elites of the emerging city of Buenos Aires, here considers the bureaucracy put into place by the Bourbon reforms. The author examines the professional and personal circumstances of all bureaucrats, from the high-ranking heads of agencies to the more lowly clerks, contrasting their expectations and their actual experiences. She pays particular attention to their recruitment, promotion, salary, and retirement, as well as their marriage and kinship relationships in the local society.
